

Platform limit

deactivates on completion,
not on session start

→ deactivates on completion, not on session start

CMS flag + rebuild

can fail silently,
nobody is watching

→ can fail silently; nobody is watching

CDN edge

serves 'available' for
minutes after

→ serves 'available' for minutes after

Client-side check

survives stale cache,
failed build, bfcache

→ survives stale cache, failed build, bfcache

No platform in this price range guarantees atomicity. The bottom layer is the cheapest and the only one that survives the other three failing.
