

the drawing, as supplied

density — blurred at 0.5% of the side

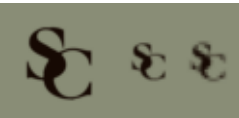

letters — density over 0.22

traced: one path, 64 curves

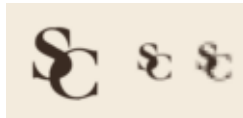

on the wall

reversed, on the bar

on the mat

One colour, so it takes the colour of whatever it is set in — which the drawing cannot do at all. What it cannot carry is the interlock: one colour cannot say which stroke passes in front, and the two letters fuse where they cross.
