

Primary — --field on the sheet

Reversed — the tab, the masthead

One colour — print

Hatched — 45°, above ~96 px

180 px — the home screen

32 px — favicon.ico

16 px — the browser tab

All three are the same file, cut at the size they are labelled with and then enlarged. The hatching is gone by 32 px; by 16 px the S is a suggestion and the C carries the mark.
